

# Calibration Management & Metrology Services

## On-site & ship-in

instrument calibration  
services

## Trained & certified technicians

## Flexible

to meet clients'  
specific requirements

## ISO/IEC 17025

accredited  
calibration service

**Full Spectrum Lab Services from CBRE** provide a range of Metrology Services options for calibrating your equipment. Solutions can be single service, or a blend of all of them. Our experts will work closely with you to establish the right blend of services that best meet your specific needs.

## Metrology Services

- State-of-the-art Metrology laboratories, enabling us to deliver unparalleled ship-in service, with typically a 7-10 day turnaround
- Certified Metrologists located near you who can provide on-site calibration for most of your measurement and process equipment
- Providing on-site and ship-in dimensional inspection services to verify your fixtures, or perform part layouts

## Calibration Capabilities

- Including; anemometers, chart recorders, height gauges, inspection light booths, multimeters, pH/conductivity, indicators, pressure gauges, tachometers, calipers, thermocouples, thread plugs, torque wrenches, fume hoods, biosafety cabinets, hardness testers, hygrometers, micrometers, oscilloscopes, pin gauges, surface plates, temperature controllers, thermometers, pipettes, timers/stopwatches, weigh scales

## Additional Calibration Management & Metrology Services

- Recalibration Notices; enabling you to schedule calibrations/equipment downtime in advance
- Traceable Calibrations and certifications that meet stringent requirements of ISO, DOD, EPA, FDA, NRC and other regulatory agencies, plus supply of all before & after calibration data
- Calibration Database Management; 24/7 web access to equipment calibration data & archive

## Metrology Consulting

- Our Consulting team provide proven strategies for corporations spanning a wide variety of industry sectors
- Experienced Metrologists assist you in your certification maintenance process
- We can partner with you to provide expert advice for your Engineering and Quality staff in measurement methodologies and insights into Calibration and Metrology best practices

## Turnkey Calibration Programs

- Supporting your teams as you undergo ISO, FDA, EPA, MHRA and other regulatory audits
- Turnkey gauge management programs to assist in attaining your quality goals and passing your quality systems audits
- Managing every aspect of the calibration of your entire facility, with programs designed around your specific requirements
